

Welcome to the
World of Connected Products and
Human Machine Interfaces

neverMind supports its customers in the evolution to a world of smart interfaces and connected products.

Easily and reliably create, interface & connect devices whatever sector you operate in. We develop smart connected interfaces, Human to Machine or Machine to Machine for products and processes. We integrate state-of-the-art connectivity technologies into innovative solutions.

We engineer mechatronic interfaces and embedded wireless systems, addressing the industry 4.0 and IoT challenges.

We interface

We develop custom Human Machine Interfaces

- With proximity detection solutions
- With touch detection solutions
- With Graphical user Interface
- And user interfaces on Mobile & Tablet

We connect

neverMind provides solutions addressing the challenges of the Internet of things and the industry 4.0

- By adding connectivity to existing systems/products
- By developing custom new smart connected products

We develop your products

neverMind provides marketing & engineering support to customize your products roadmap and/or develop products according to your needs.

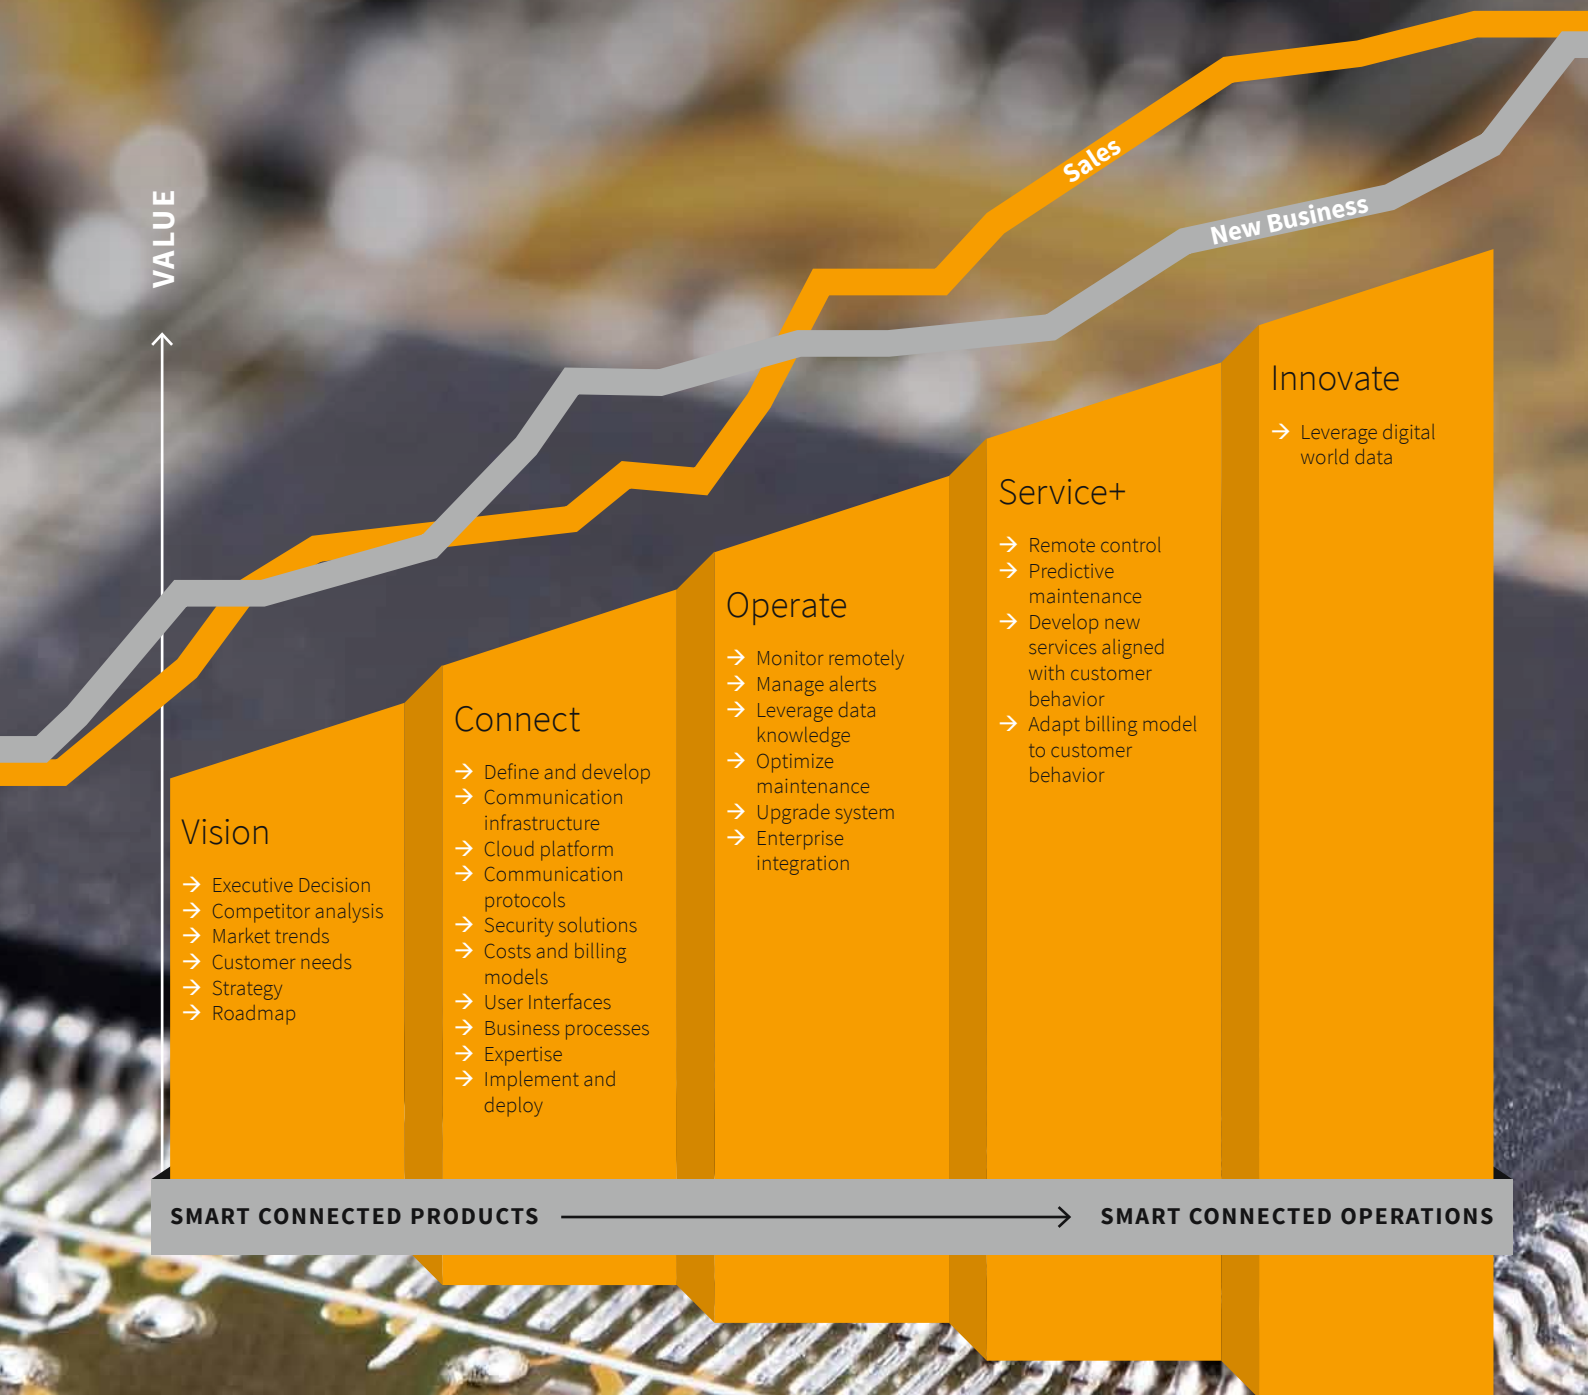

→ **ELECTRONIC HARDWARE DEVELOPMENT**

→ **EMBEDDED SOFTWARE DEVELOPMENT**

→ **MECHANICAL DEVELOPMENT**

Need to connect new or existing products to the Internet Of Things?

New revenue with digital transformation

We want to add value to the way in which devices operate.

We offer our customers more than 15 years of experience in international automotive and consumer business.

**neverMind
multi skilled team
close to you**
